

PRESS RELEASE

Autobox in Spain

Autobox Ltd, the UK based manufacturer of Short Run Corrugated Box Making Systems, working with its Spanish Partner Eurotech S.A. have installed the third HIPAK boxmaker in Spain.

The HIPAK machine, which uses the latest control technology to reduce the order change over times to less than 1 minute, was purchased by Embalajes Armando - a box manufacturer based in Vigo.

Having seen that the demand for short-runs of corrugated boxes within the Spanish market is increasing, Armando were keen to take advantage of the speed and flexibility of the Autobox machine. "Using the HIPAK means that we are able to respond faster to our clients needs by offering quicker deliveries, whilst saving money on print set-up and origination. We are now more competitive as we can produce more orders in less time." Comments Agapito Costas of Armando

The concept of the Autobox system is to offer boxmaking companies the ability to produce short-runs of corrugated boxes, in a wide range of styles and sizes, at a moments notice.
